PROFILE

Frontend Developer specializing in ReactJS and Next.js, with hands-on experience building production-ready web applications through academic, internship, and personal projects. Strong foundation in responsive UI, API integration, and performance optimization. Recognized by FPT University for impactful digital projects featured on official media. Seeking a Frontend Software Engineer/Frontend Intern-to-Junior role to grow within a professional engineering team.

WORK EXPERIENCE

Frontend Intern - FPT Software

May 2024 - September 2024

PROJECT EXPERIENCE

Tay Ninh Historical Sites Website | Frontend Developer

Github: https://github.com/thtung-bomb/SEP490_Travelogue_Frontend.git

- Designed and developed a responsive website introducing historical landmarks in Tay Ninh.
- Applied on-page SEO techniques including meta tags, alt attributes, structured headings, and sitemap.
- Optimized frontend performance.

Pregnancy Growth Tracking System | Frontend Developer

Github: <https://github.com/thtung-bomb/pregnancy-growth-tracking-system.git>

- Developed responsive user interfaces for a pregnancy healthcare tracking system.
- Implemented mobile-first layouts supporting both desktop and mobile devices.
- Integrated RESTful APIs to display real-time growth and health data.
- Collaborated with backend team to align API contracts and data flows.

E-Learning Platform (Internship - FPT Software) | Frontend Developer

ReactJS, Redux-Saga, Styled Components

- Built an interactive online learning platform inspired by Udemy.
- Managed complex application state and asynchronous workflows using Redux-Saga.
- Designed modular, reusable UI components following clean code principles.
- Integrated frontend features with RESTful APIs for authentication and course management.
- Worked in an Agile team environment, participating in sprint planning and code reviews.

EDUCATION

Bachelor of Software Engineering

FPT University

2021 - 2025
